ABOUT

- I am a grade eleven student with an great passion for helping others and ensuring that any experience they partake in can be as streamlined as possible. I am incredibly hardworking, strong-willed, a good collaborator, while also being a strong independent worker

- Run and plan weekly entrepreneurship lectures for nearly 100 high school students.
- Mark assignments, provide advice and mentorship to startups.
- Help students garner real life skills and generate funding through a variety of competitions.
- Assisted hundreds of attendees in a high-pressure environment with product inquiries.
- Provided attendees with the required tech(needed to complete the project efficiently.
- Assisted in helping streamline the opening ceremony, directing over 1000 students.
- Helped youth in the community try out hockey with various skill training devices.
- Canvassed the KMHA house league program to kids and their parents.
- Helped clients and interested adults and children by answering their questions and providing relevant information.
- Assisted participants working on technical projects with any issues they had.
- Helped participants out with any questions they had on how to execute their project.
- Currently enrolled as a grade 11 student
- Also enrolled in the International Baccalaureate program
- I am involved in the following extracurriculars: debate club, math club and programming club.
- I also help run the Engineering Club, which involves conducting lectures and giving assistance to new members
